mPrest – from our experience to your needs

Rational suit for ALM

IBM® Rational® **application lifecycle management (ALM)** solutions help your organization manage its software development and delivery from the initial requirements definition to software change and release management and beyond.

Application lifecycle management coordinates people, processes, and tools in an iterative cycle of inter-related activities, including definition, design, development and testing, testing, deployment, and management.

Rational **application lifecycle management** solutions can help address your current business requirements, enhance productivity through automation, and accelerate better decision-making with award-winning products and best practices.

mPrest know how

We have developed leading edge technology for the most demanding customers and projects (Health , military and others) – Use our 20+ year experience in order to make your applications better and faster – in order to decrease costs and reduce Time To Market (TTM)
